

Square Processing Fee

After Square raised their fee by charging an amount instead of a percentage, we decided to add a 1% Square Processing Fee to cover the gap, instead of installing a \$5 minimum by credit card rule.

On a \$20 transaction, it will charge you 20cts.

We found this to be a good compromise as a lot of people do not carry cash anymore, and a lot of small businesses have minimum amounts required for credit card transactions.

In any case, if you disagree with our decision, we will gladly refund your fee if you let us know.
